Professional Summary

Software engineer with 4+ years of international experience building enterprise systems for Finnish and Japanese clients, now an MSc Data Science student at Tampere University specializing in data-intensive systems. Research Assistant on the EUR 4M SECHA project, designing data pipelines that unify heterogeneous EV charging data into one platform. Seeking software and data engineering roles in Finland combining production-grade engineering with applied data research.

Experience

Tampere University

Tampere, Finland

Research Assistant, Master's Thesis Research (Full-time)

May 2026 – Present

- Conduct master's thesis research on EV charging data interoperability in SECHA, an EUR 4M Business Finland Co-Innovation project coordinated by Tampere University with VTT and LUT University.
- Analyze and map heterogeneous data formats, schemas, and system architectures across industrial and grid partners to define integration requirements for a unified data platform.
- Design and develop a proof-of-concept data pipeline that ingests, transforms, and standardizes diverse EV charging data, forming the basis of a reference interoperability framework for the energy ecosystem.
- Collaborate with the Database Systems Research Group on scalable, energy-efficient data management and engage consortium stakeholders to align solutions with real-world energy and mobility use cases.

BJIT Ltd.

Dhaka, Bangladesh

Software Engineer (Full-time)

Oct. 2021 – Jun. 2025

- Delivered end-to-end features as a full-stack engineer on enterprise projects for clients including Visma Finland, GCC Japan, and Shin-Etsu Chemical across the ERP, education, and laboratory management domains.
- Designed and implemented RESTful APIs in both microservice and monolithic architectures, integrated Angular frontends with Spring Boot backends, and ensured reliability through comprehensive unit testing.
- Migrated legacy PowerBuilder systems to modern Java web solutions, developed reporting modules with JasperReports, and optimized database interactions for performance and maintainability.
- Collaborated with cross-cultural Agile/Scrum teams throughout the full SDLC, applying CI/CD practices, code reviews, and documentation to ship scalable, high-quality software.

DVL Denim Ltd.

Dhaka, Bangladesh

IT Executive (Part-time)

Mar. 2021 – Sep. 2021

- Built a headless Raspberry Pi NAS with Ubuntu and Samba while exploring networking tools and protocols.

Education

Tampere University

Tampere, Finland

MSc in Data Science, Minor in Software, Web & Cloud Technologies

Aug. 2025 – Dec. 2026 (expected)

North South University

Dhaka, Bangladesh

BSc in Computer Science and Engineering, CGPA: 3.56/4.00, Cum Laude

May 2015 – Dec. 2020

Skills

Programming & Backend: Java, Python, SQL, Spring Boot, Spring Data, Spring Security, RESTful APIs

Frontend & Web: Angular, TypeScript, JavaScript, HTML, CSS

Databases & Data: MariaDB, PostgreSQL, RabbitMQ, JasperReports, data modeling, ETL/ELT pipelines

Tools & Practices: Git, Docker, Jenkins, CI/CD, Jira, Confluence, Markdown, Agile/Scrum, unit testing

Languages: English (fluent, IELTS 7.0), Bengali (native), Finnish (elementary), Hindi (basic)

Professional Projects

Fikuro, Visma Finland: Delivered full-stack features for an ERP platform, enabling scalable operations and real-time reporting for Finnish SMEs. (*Java, Spring Boot, Angular, MariaDB, RabbitMQ, JasperReports, LaunchDarkly, Snowplow*)

Mealkun, GCC Japan: Migrated a legacy system to a modern web stack and added reporting features that streamline school meal management across Japan. (*Java, Spring Boot, Angular, PostgreSQL, JasperReports, PowerBuilder*)

RIMS, Shin-Etsu Chemical: Led reporting and API migration for a laboratory chemical management system, modernizing a legacy PowerBuilder platform. (*Java, Spring Boot, Angular, PostgreSQL, JasperReports, PowerBuilder*)

Achievements & Certifications

- Awarded a 50% tuition fee scholarship (2026–2027) at Tampere University for strong first-year MSc performance.
- Named Best Performer of the Year (2023–2024) at BJIT Ltd. for outstanding professional contribution.
- Achieved the 5-star Gold badge in Java on HackerRank and completed all levels of the Google FooBar challenge.
- Earned the Scrum Team Member Accredited Certification in agile, collaborative software development.

Volunteer Experience

Tampere University

Tampere, Finland

Student Ambassador & Content Crew (Part-time)

Sep. 2025 – Present

- Share authentic student experiences through published blogs and social media to guide prospective applicants.
